PROFILE

I am a senior year IT student specializing in software engineering. With a background in both business and technology, I bring a unique perspective to problem-solving and innovation. I am passionate about leveraging technology to solve complex problems and am excited to contribute my skills to a dynamic team that values innovation and collaboration.

EXPERIENCE

IKEA - CUSTOMER SERVICE AND LOGISTIC CO-WORKER

2019 - Present

Part-time job besides my studies.

Working languages: Finnish & English

Achievement: teamwork, problem-solving, efficiency, communication

PROJECTS

HELSINKI BIKE APP

- Develop a web app to show all the stations and journeys in Helsinki
- Learned how to handle a large size of data (3 million lines), performing filtering and removing duplication. Server-side pagination, sorting, and searching were implemented.
- Technologies used: Node JS, Express, Postgres, React, JavaScript, MUI Datagrid
- Github link: <https://github.com/Jackson1611/helsinki-bike-app>

BOOKSTORE

- Built a website to manage all the books of a bookstore.
- The app lets the user browse all the available book and the admin edits and delete the books with JWT authentication.
- Built with Java Spring Boot for the back end and Thymeleaf template for the front end.

BASECOIN

- Built a responsive mobile-friendly app to show the top cryptocurrencies, market prices, and all the information about each coin that you need to know with the help of CoinGecko API.
- Technologies used: React, Typescript, Chartjs, Tailwindcss
- Demo: <https://basecoinapp.netlify.app/>

CAMP ADVISOR

Developed a full-stack camp advisor with NodeJS and ExpressJS using MongoDB database with full authentication, and validation, and EJS template
